## ECO FAST

## ENGLISH

### ECO FAST

is a CNC machine with 3 controlled Axes.

ECO FAST uses two blades technology in order to obtain straight ducts and special pieces in pre-insulated.

In this field, ECO FAST is the first machine using two-blades-technology that, compared to a milling machine, permits to reduce the material wastages of about 15%. The machine is really user-friendly, because it is simple to program and to use. In addition, ECO SILENT is the fastest machine in the market.

Indeed, thanks to Brushless motors, ECO FAST reach really high working speed (35 linear mt. per minute) and rapid displacement; furthermore, you don't need to do zeroing operations anymore.

## TECHNICAL DETAILS

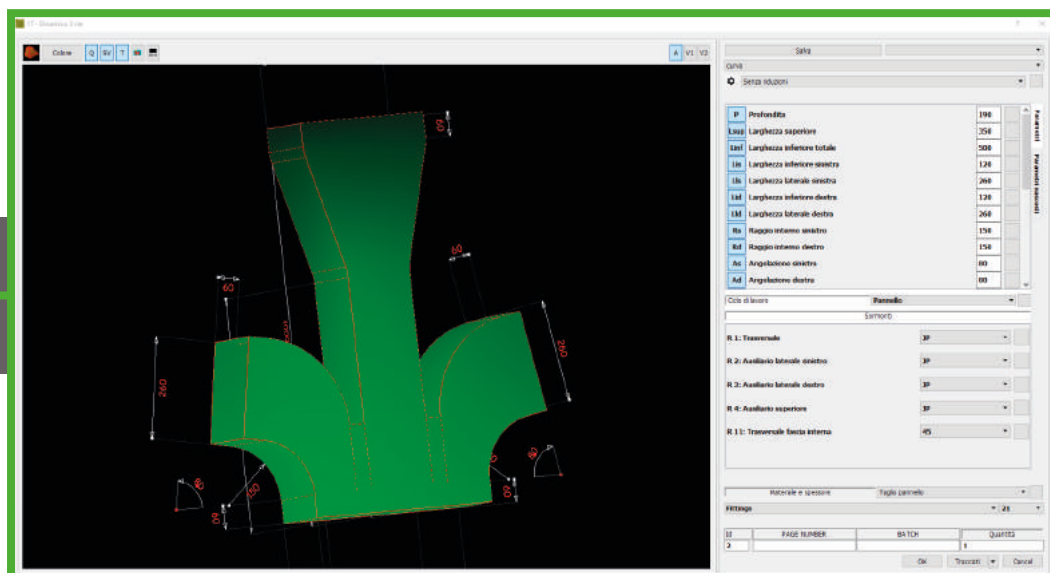

Minimum panel thickness	10 mm
Maximum panel thickness	30 mm
Maximum aluminium thickness	200 Micron
Minimum panel width	600 mm

Maximum panel width	1200 mm
Maximum panel length	UNLIMITED
Weight of the machine	1400 Kg
Size of the machine	840x240xh.175cm

## PROGRAMMING SYSTEM

The parametric CUTEXPERT software, based on WINDOWS operative system, is intuitive and simple to learn. CUTEXPERT allows you to choose and parameterize dozens of pieces and then it will automatically arrange them on the working area with the best space optimization, reducing dramatically the material wastage.

Through a CAD CAM system it is easy to import 2D DXF drawings directly to the CUTEXPERT.
